

# What is Flexbox?

→ responsive ↖

## Flexible Box Layout

It is a one-dimensional layout method for arranging items in rows or columns.

# The Flex Model

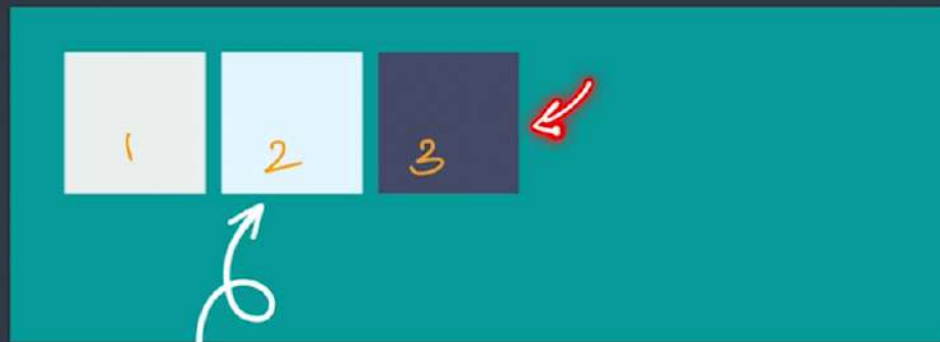

direction = row

nehagupta7385@gmail.com

## General Example

flex item

block ✓  
inline ✓  
inline-block —

div

flex container

`display: flex`

`<div>`

`</div>`

`<div>`

`</div>`

`</div>`

bar

## Flexbox Direction

It sets **how flex items are placed** in the flex container, along which axis and direction.

- **flexbox-direction : row;**      main axis, left to right
- **flexbox-direction : row-reverse;**      main axis, right to left
- **flexbox-direction : column;**      cross axis, top to bottom
- **flexbox-direction : column-reverse;**      cross axis, bottom to top

miner, along which axis and direction.

## Justify Content

Tells how the browser **distributes space** between and around content items along the main-axis

- `justify-content : flex-start;`
- `justify-content : flex-end;`
- `justify-content : center;`

# Justify Content

- **justify-content : space-between;**
- **justify-content : space-around;**
- **justify-content : space-evenly;**

## Flex Wrap

Sets whether flex items are **forced onto one line or can wrap** onto multiple lines

- `flex-wrap : nowrap;`
  - `flex-wrap : wrap;`
  - `flex-wrap : wrap-reverse;`
- 

# Align Items

**Distributes our items along the cross axis**

- **justify-content : flex-start;**
- **justify-content : flex-end;**
- **justify-content : center;**

# Align Items

- **justify-content : baseline;**

## Align Content ✓

it sets the distribution of **space between and around** content items along a flexbox's cross-axis

- align-content : flex-start / flex-end / center
- align-content : space-between / space-around / evenly
- align-content : baseline;

# Align Self

Aligns an item along the **cross axis**

- **align-self : flex-start;**
- **align-self : flex-end;**
- **align-self : center;**
- **align-self : baseline;**

Align Self

individual

align items (groups)

align self > align ~~COLLEGE~~

## Flex Sizing

- **flex-basis**

It sets the initial main size of a flex item.

`flex-basis : 100px;`

# Flex Sizing

- flex-basis

It sets the initial main size of a flex item.

`flex-basis : 100px;`

## Flex Sizing

- **flex-grow**

It specifies how much of the flex container's remaining space should be assigned to the flex item's main size

snehagupta7385@gmail.com

**flex-grow : 1**      (default)

## Flex Sizing

- **flex-shrink**

overflow

It sets the flex shrink factor of a flex item.

**flex-shrink : 1**

# Flex Shorthand

- flex-grow | flex-shrink | flex-basis

**flex : 2 2 100px;**

- flex-grow | flex-basis

**flex : 2 100px;**

- flex-grow (unitless)

**flex : 2;**

- flex-basis

**flex : 100px;**

Qs. Re-create the following layout using flexbox as closely as possible :

A

B

C

D

E

F

G

H

I

- Take the container height & width as 400px & child height & width as 100px.
- Font size of text as 50px.

Qs. Re-create the following layout using flexbox as closely as possible :

logo   Home   About   Contact

- Take the container height & width as(50px, 900px) & child height & width as (50px, 80px).
- Use font-size as 24px

Qs. Try solving a few Flexbox based games here :

## Practice Solutions

### Answers

#### HTML Code

```
<!DOCTYPE html>
<html lang="en">
<head>
<meta charset="UTF-8" />
<meta http-equiv="X-UA-Compatible" content="IE=edge" />
<meta name="viewport" content="width=device-width,
initial-scale=1.0" />
<title>CSS Assignment</title>
<link rel="stylesheet" href="style.css" />
</head>
<body>
<div id="container">
<div class="box">A</div>
<div class="box">B</div>
<div class="box">C</div>
<div class="box">D</div>
<div class="box">E</div>
<div class="box">F</div>
<div class="box">G</div>
<div class="box">H</div>
<div class="box">I</div>
```

```
</div>
<br>
<div id="navbar">
<div class="option">logo</div>
<div class="option">Home</div>
<div class="option">About</div>
<div class="option">Contact</div>
</div>
</body>
</html>
```

## CSS Code

```
/* Ans 1 */
#container {
  height: 400px;
  width: 400px;
  background-color: white;
  border: 2px solid lightseagreen;
  border-radius: 10px;
  display: flex;
  flex-wrap: wrap;
  justify-content: space-evenly;
  align-items: center;
}

.box {
  height: 100px;
  width: 100px;
```

```
background-color: grey;
border: 2px solid black;
border-radius: 10px;
font-size: 50px;
text-align: center;
}

/* Ans 2 */
#navbar {
  height: 50px;
  width: 900px;
  background-color: pink;
  border: 2px solid lightseagreen;
  border-radius: 10px;
  display: flex;
  justify-content: flex-start;
  align-content: center;
}

.option {
  height: 50px;
  width: 80px;
  border-radius: 10px;
  margin-left: 5px;
  font-size: 24px;
  line-height: 50px;
}
```

# Flexbox Cheatsheet

snehagupta7385@gmail.com

To activate powers

`display: flex;` on flex `container`

Do you want rows or columns?

rows

columns

`flex-direction: row;` on `container`

`flex-direction: column;` on `container`

OR

`flex-direction: row-reverse;` on container

OR

`flex-direction: column-reverse;` on container

Do you want these items located at the beginning of the main axis?

YES, beginning

OK, default value has you covered.

`justify-content: flex-start;` on container

NO, other

OK, use one of these

`justify-content: flex-end;` on container

OR

`justify-content: center;` on container

OR

`justify-content: space-between;` on

OR

`justify-content: space-around;` on container

shohagupta7385@gmail.com

Do you want the items on one line or to move to another when adjusting viewport?

One line

Move to another

OK, default value has you covered.

`flex-wrap: nowrap;` on container

OK, use one of these:

`flex-wrap: wrap;` on container

OR

`flex-wrap: wrap-reverse;` on container

How do you want these items laid out on the cross axis?

stretched

not stretched

snehagupta7385@gmail.com

OK, default value has you covered.

OK, use one of these:

OR

OR

OR

If you have multiple lines of content, how do you want this aligned?

stretched

OK, default value has you covered.

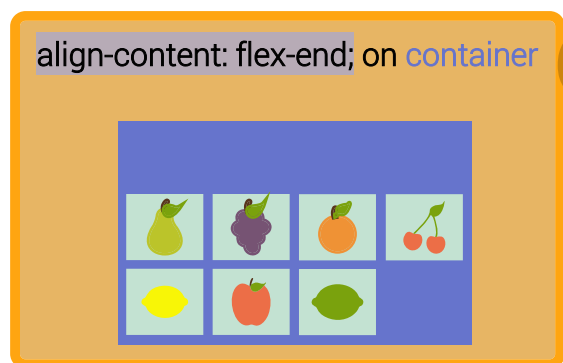

not stretched

OK, use one of these:

OR

OR

snehagupta7385@gmail.com

align-content: space-between; on container

OR

align-content: space-around; on container

snehagupta7385@gmail.com

Do you want to change the order of the items?

Awesome, don't do anything.  
That was easy.

OK, use these:

order: <whole number>; on item

Do you need some items to grow if necessary?

Awesome, don't do anything. That was easy.

OK, use these:

Flex-grow: <whole number>; on item

Do any of these items need to be aligned differently than the others?

OK, you're done. That was super easy.

OK, use these:

align-self: flex-start; on item

OR

OR

OR

OR
